Evan Dastin-van Rijn

dasti006@umn.edu   401-787-8534

Education

University of Minnesota-Twin Cities   **Minneapolis, MN**
PhD in Biomedical Engineering, Translational Neuroengineering Lab   Fall 2017-Spring 2021

Brown University   **Providence, RI**
Bachelor of Science in Biomedical Engineering and Neuroscience   Fall 2017-Spring 2021
Magna cum laude, Honors in Biomedical Engineering
Cumulative GPA 4.0/4.0

St. John's International School   **Waterloo, Belgium**
43 points in the IB Diploma (HL: Chemistry, Math, Physics, Philosophy)

Research Experience

Research Assistant, Borton Laboratory   09/2018-08/2021
Assisted with a study working towards the development of an adaptive system to treat symptoms of OCD using deep brain stimulation (DBS)
- Developed Period-based Artifact Reconstruction and Removal Method (PARRM), a novel method for neurostimulation artifact removal showing improved performance over existing, state-of-the-art methods
- Developed Period Estimation of Lost Packets (PELP), a solution to temporal alignment of packet losses occurring during recordings with implanted bidirectional stimulators
- Analyzed and evaluated approaches to data imputation to enable interpretation of neural timeseries with missing samples
- Performed neural data analysis that was used to meet NIH milestones
- Programmed a cognitive control task using jsPsych for use in the clinic and at home settings
- Developed a neural and video data preprocessing pipeline for accurate temporal alignment of multimodal data streams
- Developed programs and workflows to aid in data validation and quality assurance

Research Assistant, Learning, Memory & Decision Lab   05/2020-08/2021
Developed a series of computational models in MATLAB to determine and analyze differences in latent structure learning measured using a computer-based behavioral task

Research Assistant, Salomon Laboratory   05/2018-08/2018
Using Java, FileMaker, and R, incorporated the industry standard software package Maxquant into the laboratory's software pipeline.

Student, Phage Hunters   08/2017-05/2018
Designed an algorithm to generate PCR primers particular to specific bacteriophage clusters to aid in identification prior to sequencing. Primers successfully clustered more than 1500 different bacteriophage both theoretically and in practice.

Skills and Training

Programming: MATLAB, JavaScript, Java, Android, Python, HTML/CSS, Git
Software: Adobe Suite, Solidworks, Simulink, Microsoft Office

Lab: Electroencephalography, electrocardiography, circuit design, rat handling, task shaping

Publications

Conferences and Poster Presentations

Society for Neuroscience Annual Meeting 2021   June 2021
"Effects of deep brain stimulation treatment for refractory obsessive-compulsive disorder on ventral striatal field potentials" (Co-author)
7th Annual BRAIN Initiative Investigators Meeting   June 2021
"Long-term ecological assessment of intracranial electrophysiology synchronized to behavioral markers in Obsessive-Compulsive Disorder" (Co-author)
2021 Northeast Bioengineering Conference   March 2021
"An adhesive sensor for measuring maternal sleeping position" (Presenter)
18th Society for Neuroeconomics Annual Meeting   October 2020
"Investigating individual differences in latent structure learning in a changing environment" (Presenter)

6ᵗʰ Annual BRAIN Initiative Investigators Meeting June 2020
"A novel method for DBS artifact removal: Period-based Artifact Reconstruction and Removal Method for DBS" (Presenter)
6ᵗʰ Annual BRAIN Initiative Investigators Meeting June 2020
"Chronic VC/VS DBS for OCD modulates VC/VS spectral power during rest" (Co-author)
2019 UTRA Summer Research Symposium August 2019
"Artifact removal from Local Field Potential recordings during Deep Brain Stimulation" (Presenter)
5ᵗʰ Annual BRAIN Initiative Investigators Meeting June 2019
"Preliminary experience with developing adaptive Deep Brain Stimulation for Obsessive Compulsive Disorder" (Co-author)

Teaching Experience

Teaching Assistant, Brown University 11/2020-04/2021
Was responsible for designing problem set style homework assignments, guiding student progress, and assisting with extended, open-ended final projects for Neural Computation in Learning and Decision Making

Teaching Assistant, Brown University 11/2020-04/2021
Was responsible for managing homework, lab assignments, exams, office hours, and review sessions for Transport and Biotransport Processes
Teaching Assistant, Brown University 01/2020-05/2020
Instructed students in three, week-long, MATLAB-based, design projects for Dynamics and Vibrations and held office hours to assist in debugging project code and writing reports
Meiklejohn Peer Advisor, Brown University 08/2019-05/2020
Advised a cohort of nine first-year, engineering students on adjusting to classes and lifestyle in a university setting
Classroom Assistant, STEMS 08/2018-05/2019
Assisted teachers with lessons in the classroom for high-school students in Algebra I, Geometry, and Algebra II at Hope High School in Providence
Mentor, PAL 08/2018-05/2019
Mentored two adults with learning disabilities (Stephie and Anthony) on topics of their choosing ranging from Jewish culture to driver's education

Awards

Outstanding Biomedical Engineering Senior Award	April 2021
NSF Graduate Research Fellowship	March 2021
Biomedical Engineering Graduate Merit Award	March 2021
Sigma Xi Honor Society	March 2021
Tau Beta Pi Honor Society	November 2019
Undergraduate Teaching and Research Award	May 2018
American Foreign Service Association Academic Merit Award	August 2017
